

MATERIAL BROCHURE 2023

About us

Established in 2011, Foshan H&N Decoration metal Material Engineering Co., Ltd. is a specialized enterprise that provides decorative stainless steel sheets, sheet metal processing, metal structure fabrication, and metal decoration engineering. We create architectural metal products for illuminating industry, hospitality, commercial, workplace, transportation, entertainment, and retail markets, for eleven years, we have successfully helped architects, designers, contractors and homeowners to provide stainless steel materials and total solutions that meet project requirements and budgets.

PRODUCT

Stainless steel decorative sheet(coil) | Room divider | Metal ceiling | Wall cladding | Column cladding | Wall cabinet | Commercial entrance door | Metal logo

METAL DECORATION ENGINEERING

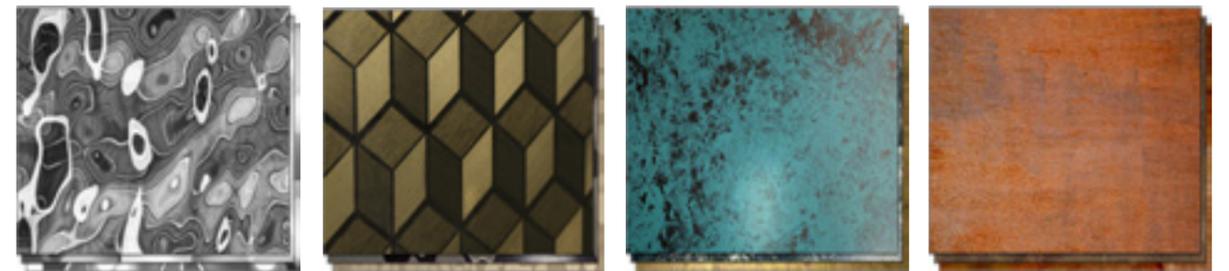

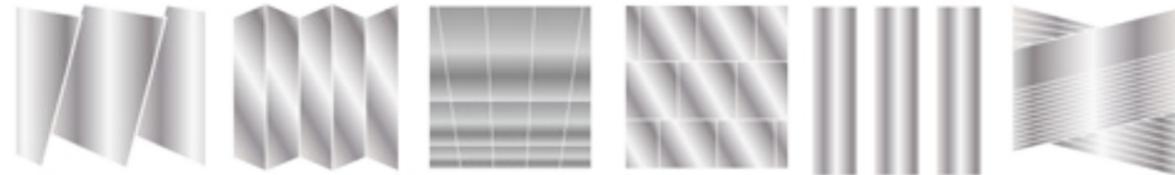

Commercial | Hotel | Office | Show room | Villa | Casino | Integrated Resorts | Food & Beverage

SURFACE PROCESS

Mirror polish | Brush | Sandblasted | Etching | Perforated | Brass | Antique | Anti finger print(AFP)

METAL WORK FABRICATION PROCESS

:Laser cutting | Welding | PVDcoating | Fabrication | Assembling Stations

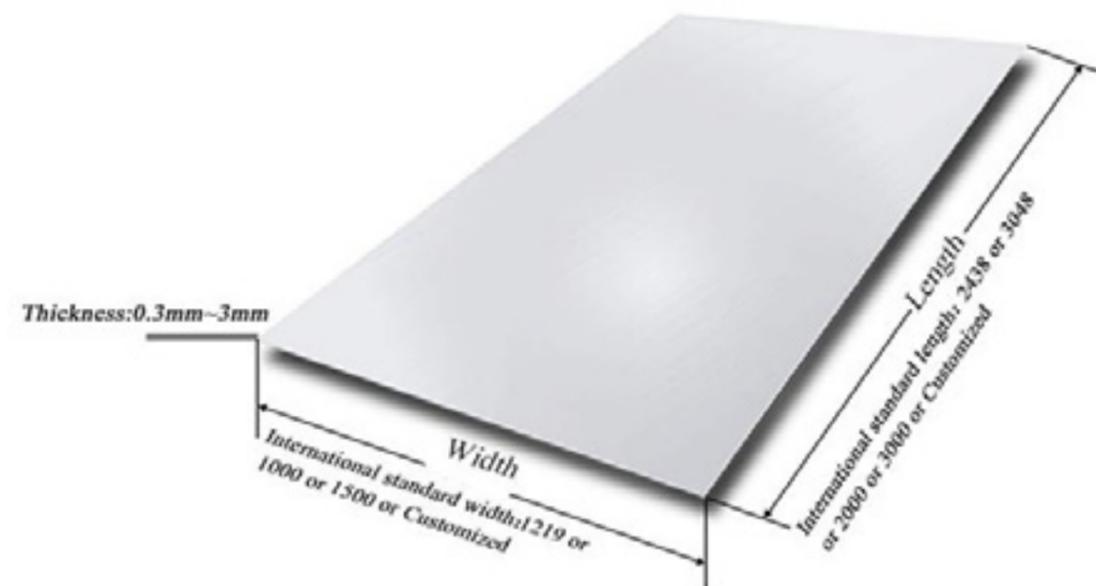

Materials

Stainless steel decorative sheet is a type of sheet metal that is made from stainless steel and is designed to be visually appealing. It is often used in interior and exterior decorative applications where both durability and aesthetic appeal are desired. H&N DECO METAL Stainless steel decorative sheets come in a variety of colors, patterns, and thicknesses, making them versatile materials for a wide range of design applications. They can be used for decorative wall panels, elevator interiors, kitchen backsplashes, and many other architectural and design projects.

Technical parameters

	Chemical Composition (%)								Tensile Test			Hardness Test	
	C	Si	Mn	P	S	Cr	Ni	Cu	0.2% Y.S(Mpa)	T.S(Mpa)	EL(%)	HRB	HV
201/J1	≤0.150	≤0.80	7.50 - 11.00	≤0.05	≤0.008	12.00 - 16.00	0.90 - 2.00	0.70-1.50	≥300	≥700	≥40	≤101	≤260

Brand Name	H&N Deco metal
Material Name	decorative stainless steel sheet
Grade	304\316\430\410\201 etc.
Thickness	0.3mm-3.0
Size	1000*2000mm/1219*2438mm/1219*3048mm/1500mm*3000mm /customized Max width 1500mm
Surface finish	2B/BA/Hairline/Cross Hairline/NO.4/Mirror/Bead Blast/Embossed/Etched/Vibration/ Stamped/Hammered/Lamination/Combination
Color	Silver/Gold/Rose gold/Chemical black/PVD black/Champange gold/bronze/Wine red/Rose red/Antique copper/Antique bronze/Antique brass/customized
Origin	POSCO,JISCO,TISCO,LISCO,BAOSTEEL etc.
Standard	JIS,AISI,ASTM,DIN,TUV,BV,SUS

Brand Name	H&N Deco metal
Material Name	decorative stainless steel coil
Grade	304\316\430\410\201 etc.
Thickness	0.3mm-1.2mm
Width	100mm-1240mm/customized
Length	As your required
Surface finish	2B/BA/Hairline/NO.4/Mirror/Embossed/Stamped
Color	Silver/Gold/Rose gold/Chemical black/PVD black/Champange gold/bronze/Wine red/Rose
Origin	POSCO,JISCO,TISCO,LISCO,BAOSTEEL etc.

Stamped sheet

Stamped stainless steel sheet is manufactured by stamping a design into a sheet of stainless steel. A die is placed on top of the material and the applied pressure is used to transfer the pattern to the surface. This method is often used for creating patterns that are repetitive and have a lot of detail. It's also possible to create more complex patterns using this method. The raised surface of stamped sheets adds a powerful impact to many applications, like ceilings, lobbies, elevators, and public spaces. Water ripple, 5WL, 6WL, diamond, square, and other surface textures are possible with stampings that offer practical value.

Application: Ceiling | Wall cladding etc.

PVD coating

PVD (physical vapor deposition) coating, also known as thin-film coating, is a process in which a solid material is vaporized in a vacuum and deposited onto the surface of a part.

Equipment Selection: We have the most advanced color coating equipment——
Horizontal And Vertical PVD coating equipment.

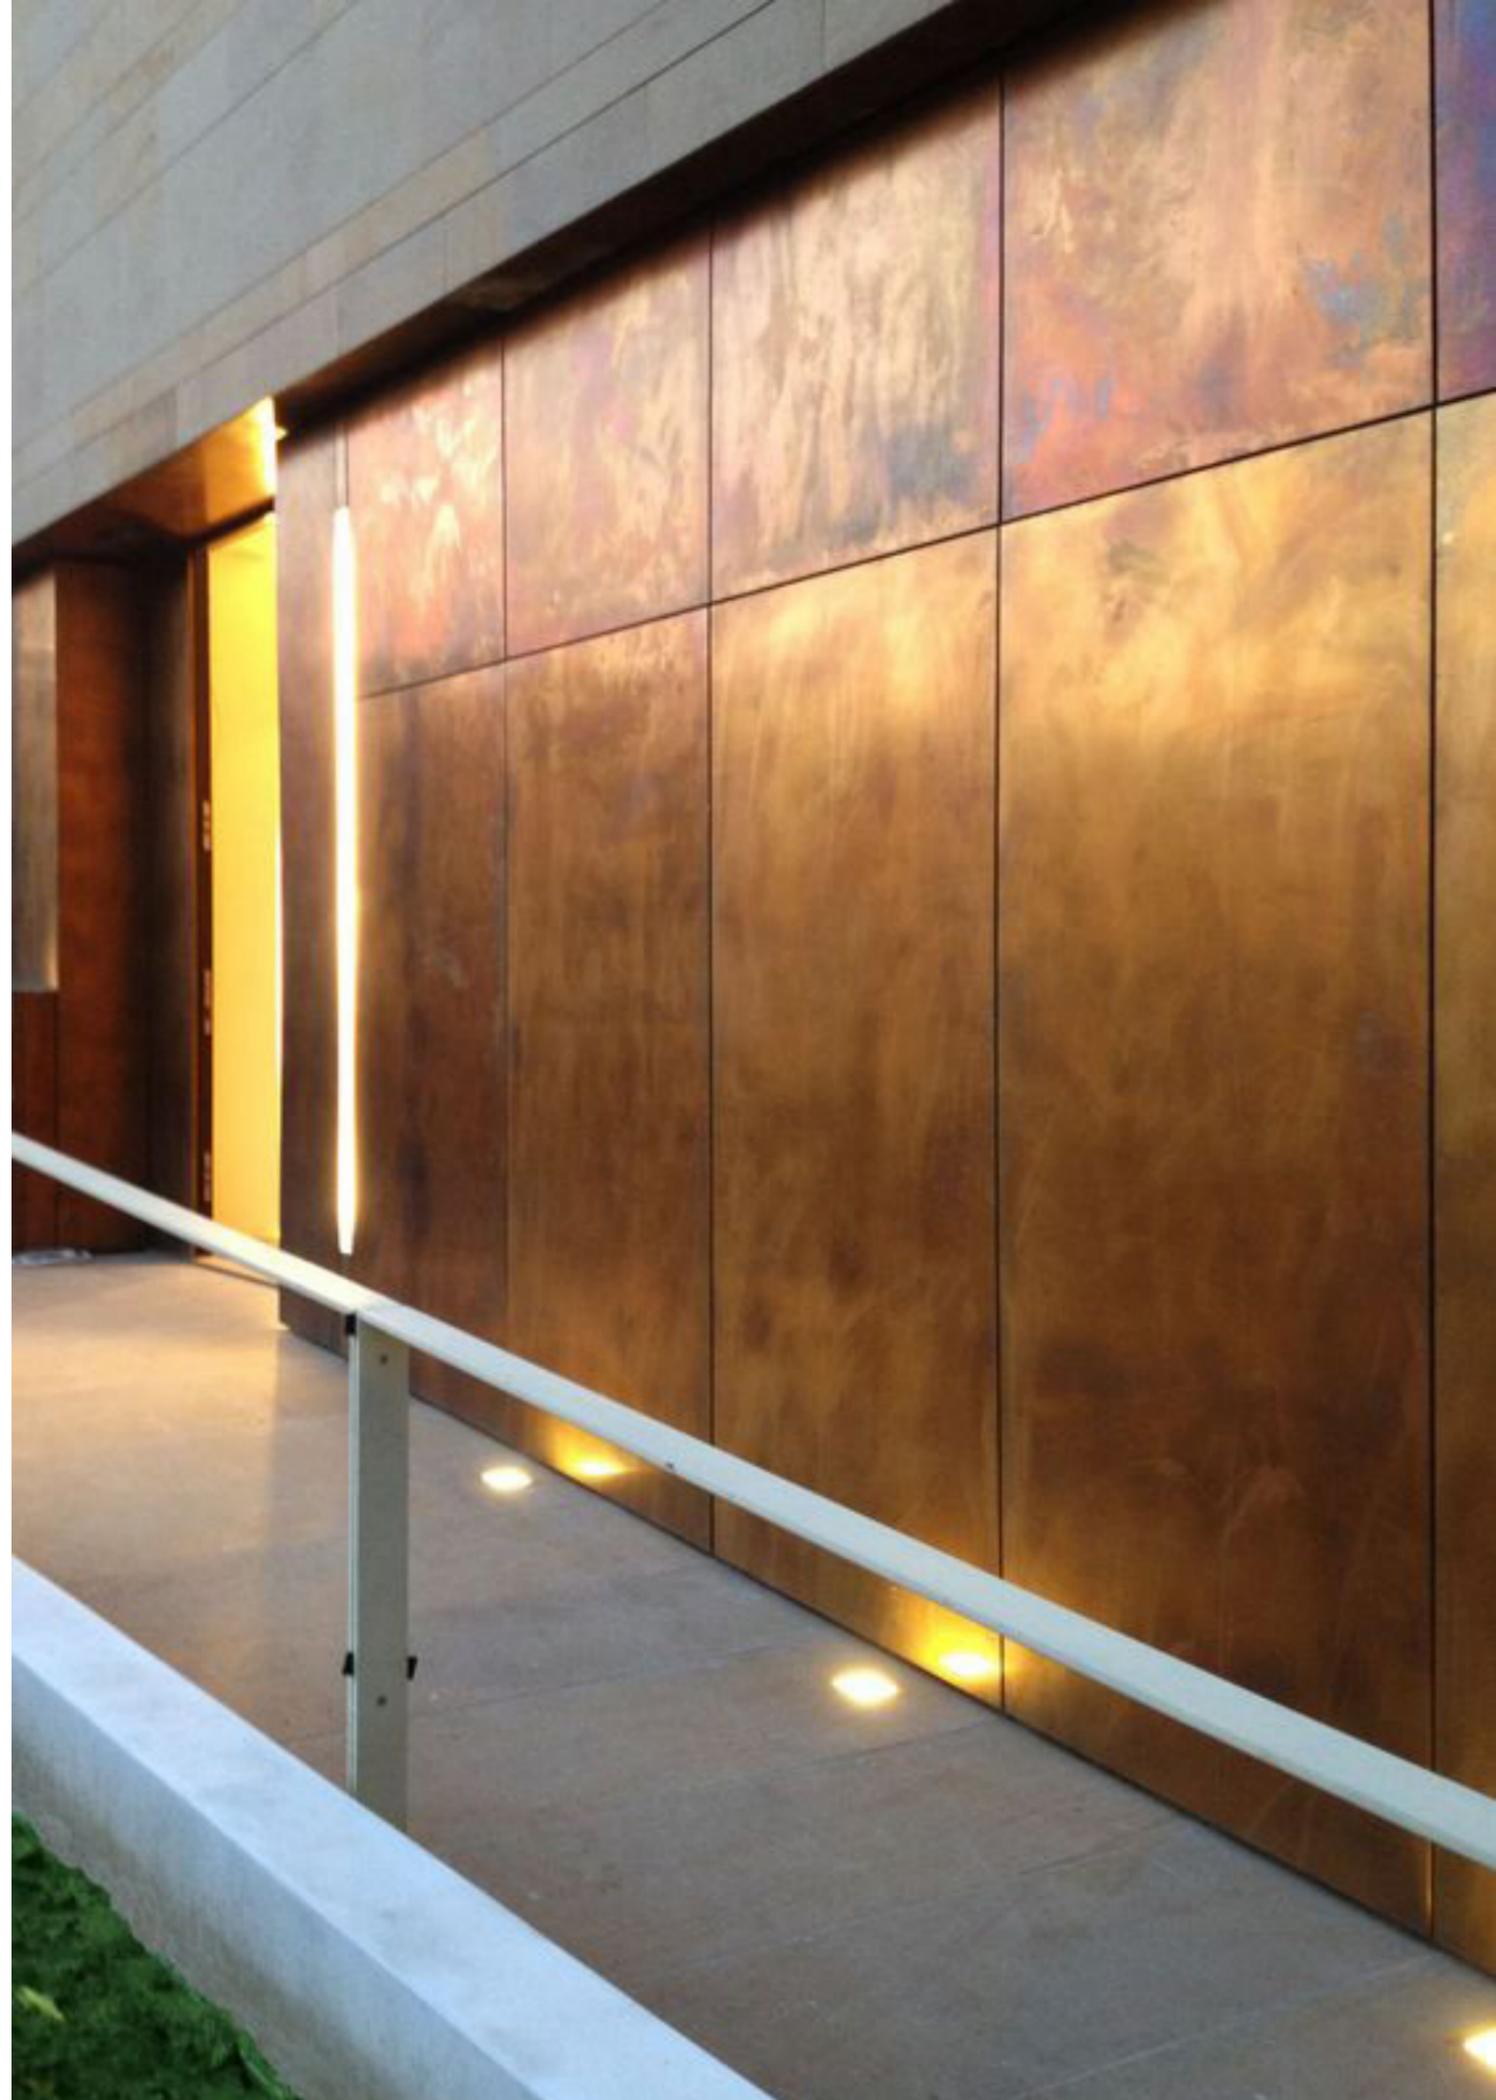

These are our regular colors, for more colors, please download our catalogue
Accept color customization, similarity can be more than 90%

Antique sheet

Stainless steel old plate is a decorative plate made of stainless steel cold rolled plate, after a series of processing such as sandpaper polishing, potion soaking, brushing, cleaning and oil sealing. It is a very beautiful, vintage and unique metal decorative material.

Application: wall caldding | dividers etc.

Patina sheet

Patina sheet, with its rusty red surface and rough feel, is often used in outdoor landscapes where its rough texture works well with plants. It can harmoniously blend into the surrounding environment and coalesce into a rich design context.

Application: wall cladding | dividers | Metal signage | Planter box etc.

Color choice

Rusty steel plate

Brand Name	H&N Deco metal
Material Name	Corten Steel Plate
Grade	Corten A/B/SPA-H
Thickness	Hot rolled:3mm~100mm
Wigth	600mm-2000mmor as customer's requirements
Length	1000mm to 12000mm or as customer's request
Application	Outdoor wall cladding、Room divider、 landscaope design etc.
Processing Service:	Welding, Punching, Cutting, Bending, Decoiling, Assembling stations
Standard	AiSi, ASTM, bs, DIN, GB, JIS
Origin	China
HS code	7219350000

Chemical Composition (%)

Grade	C	Si	Mn	P	S	Cr	Cu	V	Ni
CortenA	0.12	0.25-0.75	0.20-0.50	0.01-0.20	0.030	0.50-1.25	0.25-0.55	-	0.65
CortenB	0.16	0.30-0.50	0.80-1.25	0.030	0.030	0.40-0.65	0.25-0.40	0.02-0.10	0.40
SPA-H	0.12	0.20-0.75	0.60	0.07-0.15	0.035	0.30-1.25	0.25-0.50	-	0.65

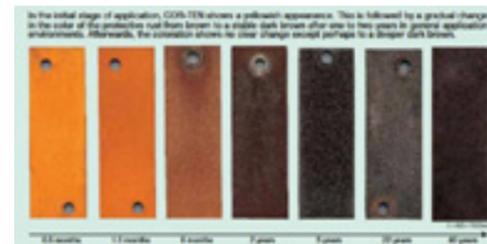

Mechanical Properties

At room temperature for plates 3mm in thickness (transverse test specimens, according to EN 10002).
Requirements to hot rolled plates 3mm in thickness according to EN 10025-5.

Grade	Minimum yield point (ReH Mpa *)	Tensile strength MPa	Minimumelongation A (Lo=5.65 ?So) %
Corten A	355	470-630	20
SPA-H	355	490	22

*) 1 Mpa = 1N/mm2

No impact test is performed on products below 6mm in thickness.

Laminated sheet

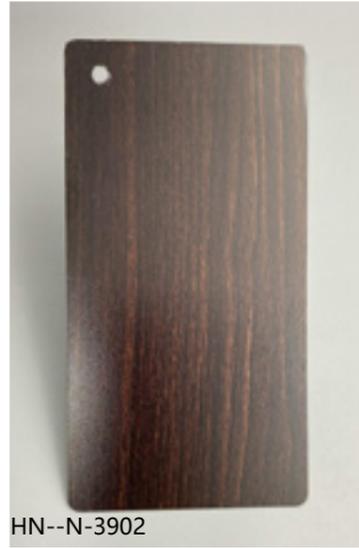

Stainless steel laminated sheet is also known as nano fingerprint-free stamping, transfer plate has many surface patterns, such as wood grain, stone grain, etc. Therefore, the use of transfer plate can obtain the look and feel of natural materials such as wood and stone, but also has the advantages of stainless steel material corrosion, durability, fire, cleaning, etc.

Application: wall cladding | column | room dividers etc.

Customized service

Already have a pattern in mind? Don't worry. We can customize according to your sample. We have rich experience in customizing materials with more than 90% similarity

Ordering

The information provided below is your guide for choosing the right H&N DECO METAL Decorative stainless steel product for your project.

APPLICATION

Please determine the environment in which the material will be used:Indoor/Outdoor/By the sea
Please identify the application scenario of the material:uses include wall cladding, room partitions, cloumn, ceiling, cabinet,logo design and more.

MATERIAL TYPE

Finishes and colors
Visit www.hndecometal.com for the latest material information

PRODUCT SIZE, FORM & QUANTITY

Number of coils and/or sheets including cut-to-size pieces and stub preferences.

w

PROCESSING

Please determine if further processing is required,

PROVIDE DESIGN DRAWINGS

We can deepen the design according to your drawings

ACCESSORIES

Determine if Wire Mesh Accessories such as Angle, Flat Bar or U-Edging framing solutions are required for your application.

Package&Delivery

Package details:

- 1) First layer by lasering PVC, second layer as China local black&white PVC.
- 2) Waterproof paper covered;
- 3) Thick wooden plates to cover;
- 4) Metal pallet for LCL to avoid damage, and full wooden pallets with covers for FCL

Marking and Loading:

PVC marking with goods details onto every sheet, marked by stickers for every single pallet, loaded as 20" container, FCL and LCL provided

Port:Foshan port

product	standard product	customized product
Lead time(days)	3-5 days	To be negotiated

Cleaning & Maintenance

How to clean stainless steel panel?

Surface condition	Cleaning method
When it is easily erased such as dust	Wash with soap, mild detergent or warm water
Label and protective film	Wipe with warm water and mild detergent and use adhesive or alcohol or organic solvent
Fat, oil and grease contamination	After wiping it with a soft cloth or paper, wash it with a neutral detergent or ammonia solution or a special cleaning agent.
Attach bleach and various acids	Immediately wash with water, soak in ammonia or sodium bicarbonate solution, and then wash with neutral detergent or warm water.
Carbonized organic material, carbon adhesion	Soak in a hot neutral detergent or ammonia solution before washing, and use a mild abrasive detergent
Fingerprint	Wipe with a soft cloth using alcohol or an organic solvent (ether, benzene) and wash with water
Rainbow pattern	It is caused by excessive use of detergent or oil, and is washed with warm water and neutral detergent.
Weld heat discoloration	After washing with 10% nitric acid solution or hydrofluoric acid, neutralize with ammonia or sodium bicarbonate solution and wash with water
Rust generated by surface contaminants	Use oxalic acid, sulfuric acid, nitric acid solution (10%) or abrasive detergent
Residual adhesive of protective film	Gently wipe with alcohol, benzene, acetone, thinner, etc.

Special Note: For problems with non-stainless steel products such as colour plates, please try the above method in an inconspicuous area or in a small area first, and if there is an effect on the colour plating on the surface of the plate. If there is an effect on the surface of the colour plate, then stop cleaning and use as appropriate!
